

University of Vic - Central University of Catalonia

Report on the Academic Year 2021-2022

INTRODUCTION

Josep Eladi Baños Díez
Rector of the University of
Vic - Central University of
Catalonia

At the University of Vic - Central University of Catalonia (UVic-UCC), the 2021-2022 academic year has been one of celebration, recognition and expansion. This year is the 25th anniversary of recognition of university status by the Parliament of Catalonia, on 21 May 1997. Under the slogan "People, knowledge, place", this celebration invites us to look back in order to continue moving forward with confidence.

Our future is based on an international outlook and the growth of research, strategic lines endorsed by UVic-UCC's breakthrough into the Times Higher Education World University Rankings: as the fourth Catalan and sixth Spanish university, in 401-500th section of a total of 1,662 universities worldwide. UVic-UCC was considered the third best young university in Catalonia and Spain, and 131st in the world. This significant milestone, the result of collective effort and countless minor achievements over time, is a turning point for UVic-UCC, giving us greater external recognition as a sound institution with unprecedented international reach. This is a recognition of the magnificent day-to-day work of the whole community over these twenty-five years.

And this is the first academic year with courses at Elisava Faculty of Design and Engineering in Barcelona

as part of UVic-UCC. More than 1,000 new students will join our federated structure, of which Elisava is the fourth component.

For the first time, the University has passed the figure of 10,000 students enrolled on recognised degree courses. But UVic-UCC growth is not reflected only in rankings and figures. In research, we can celebrate the foundation of the Institute for Research and Innovation in Life Sciences and Health in Central Catalonia, IRIS-CC, instigated by the UVic-UCC and made up of 14 academic, health and social institutions. The institute aims to generate scientific knowledge, attract and retain talent, and contribute to regional development. In terms of facilities, the Manresa Campus has seen the inauguration of the FUB4 - UEducació building, which harbours all teaching and services in this field, including the new Upetita nursery school, the first in Catalonia linked to higher education courses in Early Childhood Education.

In short, 2021-2022 has been a busy academic year at UVic-UCC. The institution is humming, marking a step change in its history. More than ever the University is growing in terms of teaching, research and international outlook, and continues to be a key factor for regional development.
